

Logic model **example** for a resilient food system strategy

Objective: To build a prosperous, resilient and equitable food system that supports the health and wellbeing of our landscapes and communities

Situation	Activities	Outputs	Outcomes		
<p>The region is a significant food producer & processor</p> <p>Food and farming are the biggest employers</p> <p>Extensive flooding has impacted the region & businesses are closing</p> <p>Food prices and food insecurity are high</p>	<p>Increase equitable access to healthy food</p> <ul style="list-style-type: none"> • Build capacity for urban and home food production • Investigate options for a community food enterprise • and more actions.... <p>Support local & regional food networks</p> <ul style="list-style-type: none"> • Procure locally sourced food for events • Invest in food distribution infrastructure such as food hubs • and more actions.... <p>Promote circular food economies</p> <ul style="list-style-type: none"> • Support food waste recycling at farm, business & household level • and more actions.... 	<p>Food growing workshops conducted</p> <p>Residents from diverse groups participated</p> <p>Funding proposal for community food enterprise developed</p> <p>Register of healthy & sustainable food businesses established</p> <p>Business case completed</p> <p>Food waste social media campaign run</p>	<p>SHORT TERM <i>1 to 5 years</i></p> <p>Residents have increased knowledge and skills for food growing</p> <p>Residents are connecting with each other around food growing</p> <p>Local food businesses register</p> <p>Households and businesses understand circular food practices, and waste recycling supports</p>	<p>MEDIUM TERM <i>3 to 5 years</i></p> <p>Residents are growing food in community spaces and their own backyards</p> <p>The community is connected and engaged in the local food network</p> <p>Local and regional food supply networks are established</p> <p>Local food procurement policy adopted & implemented by organisation</p>	<p>LONG TERM <i>5 to 10 years</i></p> <p>Residents have better physical and mental health outcomes</p> <p>Community food enterprise and food hubs distribute locally sourced affordable food</p> <p>Farmers are paid a fair price and food enterprises thrive</p> <p>Food waste is minimised at every stage of the food supply chain</p> <p>Residents are more food secure</p>
<p>Inputs</p> <p>Funding</p> <p>Staffing</p> <p>Evidence-informed programs</p> <p>Local food system network</p>					

External factors: e.g. change in government and funding for initiatives ceases, re-emergence of pandemic,and more scenarios

Explanatory notes for this worked example

- This is a partially-developed example of a logic model for a food system strategy
- This can be used to inform the development of a logic model for a food system initiative or strategy
- Developing and refining a logic model is an iterative process that can be done in collaboration with stakeholders
- For further explanation, see the logic model template
